EDUCATION

George Mason University

Fairfax, VA

Bachelor of Science in Computer Science | GPA: 3.94/4.0

Expected graduation: December 2026

Relevant Coursework: Data Structures & Algorithms, Object Oriented Programming, Systems Programming, Intro to Software Engineering, Machine/Deep Learning, Linear Algebra, Probability/Statistics, Deterministic Optimization

Achievements and Certifications: Fall 2023 - Spring 2025 Dean's List, AI4ALL Scholar Fall 2025, AWS x Audacity AI and ML Scholar (2024/25), AmazonNext x CodePath Summer 2024 Scholar, Google AI Essentials (2024) CodePath Intermediate Cybersecurity & Web Development, 2nd Place – PatriotHacks 2023 (Best Startup Track)

SKILLS

Languages: Java, Python, JavaScript, TypeScript, C, SQL, Assembly, HTML

Frameworks / Developer Tools: React, Node.js, Next.js, Vite, Flask, Stripe, Material-UI, Firebase, Clerk, Streamlit, Tailwind CSS, Git, OpenAI, AWS SageMaker, Figma, Amazon Bedrock, Hugging Face, Google Colab, Postman, Linux

EXPERIENCE

Research Assistant | Agentic AI in Education | George Mason University

June 2025 – Present

- Led requirement modeling and prototyping for a Agentic AI time management assistant, using Jupyter Notebook, Langchain and Figma to build and refine user features based on structured narratives and behavioral inputs
- Conducted comparative interviews on AI-based vs traditional time management tools, collecting insights from 60+ student that informed the development of a General User Model (GUM) for academic performance optimization

Software Engineer Intern | Anant LLC

May 2025 – Aug. 2025

- Engineered 10+ UI components using React, Figma, and TypeScript, improving user session duration by 25%
- Integrated frontend interfaces with backend APIs, boosting load speed by 30% and SEO ranking visibility by 12%
- Implemented unit and integration tests using Jest and CI/CD pipelines to reduce production bugs by 15%.
- Collaborated in an Agile environment using Git for version control and code reviews for clean maintainable code

Undergraduate Teaching Assistant | Computer Science Department

Jan. 2024 – Present

- Enhanced learning for 300+ students by leading reviews, resolving 15+ weekly queries with 1-hour avg response time, and creating support materials, boosting performance by 15% and reducing office hour wait times by 20%

PROJECTS

Doc-smart - DDM (Debate Document Manager) | Python, Tkinter, Windows COM

July 2025 – Aug. 2025

- Developed a desktop application with Tkinter GUI to manage and organize Word documents, featuring custom tagging, team assignments, advanced search/filtering, batch operations, and persistent data storage via JSON
- Implemented Windows COM integration for Microsoft Word automation, enabling one-click document opening

PQ-ACE | React, Firebase, Google Gemini AI, Tailwind CSS

Apr. 2025

- Developed an AI-powered study platform that streamlines exam prep by enabling students to upload and access past test materials, and generate personalized practice questions, cutting preparation time by over 40%
- Built a multilingual document pipeline with Gemini AI, voice input, and Firebase for Authentication and storage

Flower Species Image Classifier | PyTorch, VGG/ResNet, Matplotlib, Numpy, Google Colab

Feb. 2025

- Developed an image classification system using PyTorch with VGG to identify 102 flowers with 89.98% accuracy
- Created a modular command-line application with separate interfaces, featuring GPU acceleration, customizable hyperparameters and top-K prediction capabilities for training models and making predictions on new images

Portraitify | React, Firebase, Tailwind CSS, Vite, Stripe, Fal AI, JZIP

Jan. 2025 – Feb. 2025

- Built a full-stack AI portrait generator with real-time Stripe payments and Firebase secure authentication
- Integrated Fal AI and cloud storage to enable high-quality professional portrait delivery with customizable styles

EcoFlow | React, Firebase, Gemini AI, Google Text-to-Speech (TTS), Git

Jan. 2025 – Feb. 2025

- Implemented a real-time debate platform with secure Firebase infrastructure, role-based access, speech-to-text, and Gemini AI-powered feedback to streamline tournament flows, collaboration, and reduce prep time by 50%

EXTRACURRICULARS

- National Society for Black Engineers
- George Mason Debate Travel team (Junior Varsity)
- Mason Competitive Cyber
- Mason Autonomy and Robotic Center
- Collegiate Black Men (Ambassador)
- ColorStack
- African Student Association
- Black Male Student Initiative
